Subject: Tech Competency for O&M engr
Recommended Routing:

Flash of Brilliance

My thoughts:
What part is EC playing in the HPO development for new locker w/ the Ops community. This will directly impact the EC tech comp. and capability in civil works districts. Need some emphasis from EC to Ops in discussion

My thoughts:
Need to establish guidance for moving an engineer tech, etc. through pay band 2 from entry @ equiv GS-9 through tech specialist @ GS-13 level. Similar to control points - need to meet specific milestones i.e. P.E, etc. in order to move above a certain salary point.
